

The purpose of the Harrison Farmers Market is to provide a clean, convenient and profitable market where local farmers and artisans may sell their goods.

One our goals is to relocate in the downtown area of Harrison and provide a more permanent structure for our members. We are currently working with the City of Harrison's Strategic Growth Initiative in developing the Retail Incubator/Community Kitchen project. Part of the concept is to have a place for the farmers market to display and sell their goods.

We are working to create a sustainable market for the future.
