The data are from a variety of sources:

1. ACS 2011 refers to the US Census American Community Survey 2007-2011 five-year estimates. These are the most recent nationally available data for small geographies at the same Census 2010 boundaries as the other data provided, using a statistical technique that combines five years of data to create reliable estimates for small areas.
2. CHAS 2010 refers to the Comprehensive Housing Affordability Strategy (CHAS) special tabulations HUD receives of Census ACS data. The CHAS data used for this tool are based on ACS 2006-2010 five-year estimates see <http://www.huduser.org/portal/datasets/cp.html> for more information.
